Webinar

Unlocking Digital Marketplace platform success Strategies for maximum ROI

May 14, 2025

3 PM CEST/GMT+2 | 5 PM GST | 12 PM ET

Two live sessions – US & UK/EU/ME/Africa

This webinar explores emerging trends in Marketplace-as-a-Service (MaaS), the transformative impact of AI and APIs, and how outcome-based engagement models are reshaping long-term success strategies.

With insights from Forrester Research and real-world case studies, you'll learn how leading enterprises are using these strategies to reduce costs, boost partner sales, and drive revenue growth. Don't miss out on this opportunity to stay ahead in the rapidly evolving marketplace landscape.

The marketplace momentum

The rise of digital marketplaces is a seismic shift in how value is created, distributed, and scaled. As ecosystems become the new economy, the data speaks for itself:

Global outlook

- **$11.1 Trillion** – Total size of the global digital economy
- Nearly **50%** of that is driven by tech and ICT (Information & Communication Technology)
- **63%** of a vendor's revenue now comes from indirect partner channels

Regional growth highlights

- In the U.S., the digital economy's real value **grew 3x faster than GDP (2022)**
- India's ICT exports account for **44%** of its digital economy, with **15.5%** IT industry growth (2022)
- Mexico ranks 4th in global ICT exports, **earning $70B+ in 2021**, with **46%** of manufacturing in high-tech sectors

Changing buyer expectations

- **20%** of B2B purchase influencers now say their buying decision hinges on a supplier's ability to offer complete solutions via multi-provider ecosystems.

From building platforms to owning outcomes

Companies are shifting from building and owning platforms to orchestrating outcomes. This transition enables them to tap into external ecosystems and unlock partner-led growth, faster and with lower risk.

Organizations adopting this approach have seen:

- **40%+ increase** in partner-driven sales
- **Accelerated innovation** cycles
- **Greater agility** in market response

Real-world impact

- **Telco:** Boosted partner revenue by 50% using API-first ecosystem enablement
- **Energy:** Reduced service launch time by 30% with pre-integrated marketplace tools
- **Banking:** Monetized open banking APIs via Data-as-a-Service platforms

Meet the Speakers

> We're witnessing an explosion in AI agents, now embedded in virtually every software product. In the context of digital marketplaces, AI is no longer a feature, it's a foundational enabler, powering everything from personalization to intelligent matchmaking and real-time decision-making.

Karthik TS

Head of Technology, Torry Harris

Over the last two decades, Karthik has worked extensively with telcos, banks and financial institutions, helping define their integration strategy and onwards to realize specific digital business objectives. In his current role, he spearheads organization-wide initiatives, productizing solutions to accelerate enterprise digital imperatives.

> Marketplaces are a game-changer. They allow you to sell products you don't own, freeing up capital to invest in what you do best — serving your customers.

Guest speaker

Joe Cicman

Principal Analyst, Forrester Research

Joe helps e-business professionals optimize B2B and B2B2C e-commerce strategies and technologies. As part of the digital transformation team, he offers expert guidance on deploying digital commerce economics for optimal outcomes. His research also supports technical teams with tools and software for driving online channels, digital selling, and DTC initiatives.
